

GAST SPEDIZIONI
INTERNATIONAL FORWARDERS

Moving goods, meeting needs!

www.gastspedizioni.com

We see our long tradition of Logistics Operators not as a point of arrival but rather a source of power to fairly respond to the continuous changes of the Market and to always ensure our customers' full satisfaction.

We believe in growth as evolution of today, in line with our history and our values.

WORLDWIDE LOGISTICS SERVICES

GAST SPEDIZIONI

operates as International Freight Forwarder in the main Global Trade Markets.

PROJECT CARGO

We are specialists in moving and transporting exceptional and oversized cargoes by various means of transport.

Our experienced and professional team has the skills to look after the transports of civil and industrial plants, machineries, prefabricated items as well as entire industrial complexes, offering to our Clients full support and timely guidance throughout the transport and logistic cycle. The Service is customized and adapted to the varying needs of our Customers and the specific characteristics of each project cargo.

SHIPPING STEEL PRODUCTS

We are specialists in the transportation of steel products of all types, weights and sizes (coils, sheets, pipes, bars etc.).

CONTAINERISATION

In all Ports we have warehouses where we palletize and take care of stowage operations of any type of goods, by using modern methods and highly qualified personnel.

Containerization is managed in accordance with strict safety standards. The use of efficient processes for moving cargo, the use of state-of-the-art technical equipment, and know-how consolidated and developed over the years, allow us to meet specific needs as requested by our Customers and respond to the continuous changes in the Logistics Market.

SHIPPING RAW MATERIALS

We look after the shipping of more than 300,000 tons of raw materials per annum (ferrochrome, cast iron, ferronickel etc.)

We have dedicated warehouses where we can handle all various types of material, provide storage requirements, warehousing, weighing, unloading and/or loading on to trucks and/or wagons.

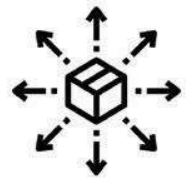

WAREHOUSE LOGISTICS

Our warehouses perform all operations of the logistics chain, in compliance with prevailing regulations and to the highest quality and safety standards.

INSURANCE

In addition to, and integrated with, our Transportation Services, we can also offer Insurance Policies to meet the various needs of our Clients and the different types of goods that they import and/or export in the international Markets.

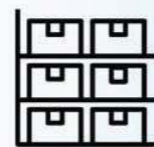

Insurance
Policy

BONDED WAREHOUSE

We offer our Clients the option of storing non-EU goods (Import not yet cleared through customs) into Customs warehouses with the status of "foreign territory", duly approved by the Country's Customs Authorities.

Goods stored into Customs Warehouses enjoy a suspended economic regime (Articles 237 et seq EU Reg 952/2013 of the EU Council): it means that payment of Duties, VAT and all customs charges applicable to imported goods are kept on hold, allowing significant strategic and financial benefits to our Customers

TAX WAREHOUSE

We also offer our Clients the option of effecting Customs Operations under the "Tax Warehousing Fiscal procedure"; this arrangement allows goods liable to VAT, to be brought into the "Tax Warehouse" after the formalities relating to payment of duties have been completed.

Businesses making use of this option thus enjoy a significant financial benefit by postponing the VAT payment on imported goods not at the time of customs clearance but only when such goods are actually brought into circulation.

A photograph of the letters 'VAT' in a bold, 3D, gold-colored font. The letters are placed on a surface covered with numerous gold coins. The background is a light, neutral color.
